

Photo Tasks For Your Group....Photography Basics

1. Take one picture of each person in your group in EACH of the styles and shots below...
6 pics total for each group member

Camera Shots

WS (Wide Shot)

The subject takes up the full frame, or at least as much as comfortably possible.

S (Mid Shot)

Shows some part of the subject in more detail while still giving an impression of the whole subject.

MCU (Medium Close Up)

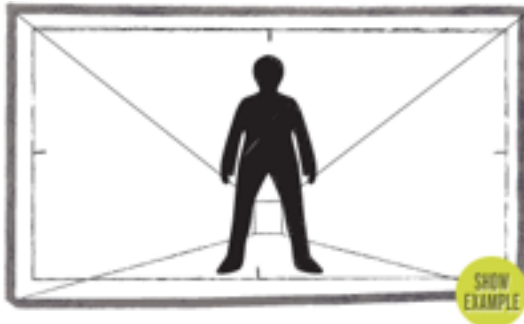

Half way between a MS and a CU.

CU (Close Up)

A certain feature or part of the subject takes up the whole frame.

Camera Angles

Low Angle Shot

A shot looking up at a character or subject often making them look bigger in the frame. It can make everyone look heroic and/or dominant. Also good for making cities look empty.

High Angle Shot

A shot looking down on a character or subject often isolating them in the frame. Nothing says Billy No Mates like a good old high angle shot.
