Door Scene Checklist

You are creating a video story to show someone walking toward a door, getting scared, then struggling to get through a door, and then getting relieved
Name_____ Period_____Group Members_____

1. Read the initial scene details on website—-and understand scene setup_____

2. Created storyboard we carry throughout the filming of the video_____

3. Got in a group- assigned roles Director- Actor- Cameraman- Grip/Helper_____

4. Went out and shot door scene video shots——

Filming 5 feet on either side of the door- using a variety of shots and angles— no zooming of the camera- showing an actor walking toward a door, hearing a scary noise and looking around, then hearing the sound again, getting more concerned, then struggling to open the door-fighting with keys—-then finally getting in door, and being relieved on the other side——
30 seconds max of the video door scene—

6. Imported door scene footage to multiple computers-_____

7. Returned all equipment video/tripods/camera card to Mr Shelor before class is over

8. Edited door scene video—-added 3 second intro AC Pathway clip_____
                    added 2 second Door Scene Title_____
                    detached all audio/sound from all clips_____
                    added <u>sound clips</u> to make story interesting_____
                    edited/trimmed clips to create good story_____
                    exported video in proper format using H264 algorithm__
                    added final 35-40 second video to google drive_____
                    shared video to weebly website/wrote short reflection__
                    gave final video to Mr Shelor_____
                    prepared 1 minute presentation for class/show video___
