# Elements of Art

Line

- the path created by a point in motion. Lines may be geometric, organic, thick, thin, rough, smooth, etc.

Shape

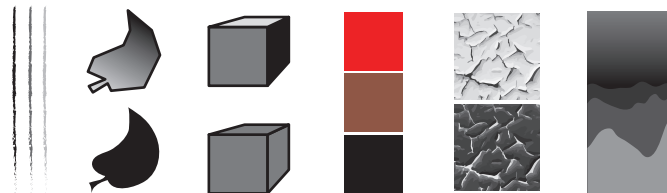

- a flat, two dimensional, area enclosed by a line. Shapes may be geometric, organic, rough, smooth, etc.

Form

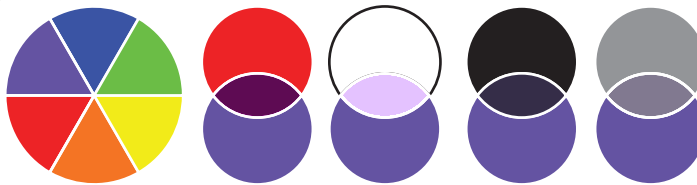

- is three dimensional. Form can either be real mass, like a statue, or the illusion of mass created by value and/or perspective.

Value

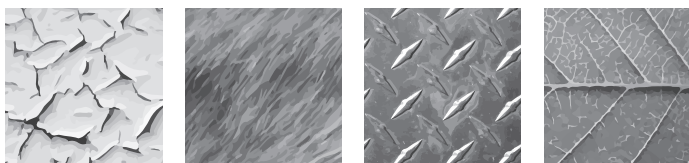

- how light or dark an element is. All of the elements of art use value. Value is important for creating contrast and form.

Color

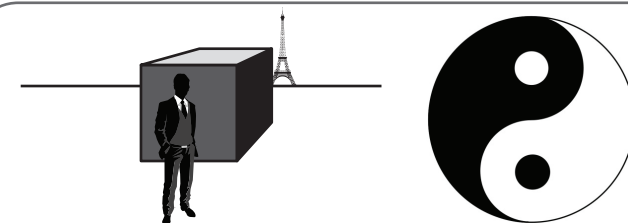

- the reflection of light captured by our eyes. Color can be mixed, tinted, shaded and toned.

Texture

- how the surface of an art piece feels, and/or how the surface appears to feel. Texture can appear rough, smooth, wet, sharp, etc.

Space

1: The illusion of depth by creating perspective. 2: Positive and negative space to create contrast.
