How to Wrap A Christmas Present

By: Miko Domingo

Step 1: Get your materials you will need; wrapping paper, tape, ribbon, and scissors.

Step 2: Put the object upside down on the wrapping paper, fold one side of the wrapping paper onto the box. Lastly on the other side of the wrapping paper make a little fold, this will make it look better at the end.

Now fold the side of the paper and make sure to crease the sides. Make sure to tape it.

Step 4: Now fold the inner flaps on the side and crease it. (Make sure to do it on the other side to)

Step 5: Fold the bottom piece and tape it.

Step 6: Flip the present upside down and make a little fold on the remaining piece.

Step 7: Now fold the top piece over and tape it down.

Step 8: Repeat steps 4 to 7 on the other side and your final result should look like this.

Step 9: Now it's time to make the bow, first flip the box over and put the ribbon under it.

Step 10: Now cross the ribbon over and after that flip the box over.

Step 11: Now that the box is facing upward make the bow by grabbing the two ends and tie it like how you tie your shoe.

Step 12: With the remaining ribbon scrape it with scissors to make it curl.
