Photoshop EZ Lesson 1 -AC Core   Name_____ Period_____
Photoshop Lesson 1: Editing a Photoshop Image
Go to http://acpathway.weebly.com to download the picture file

What You Will Learn To Do—Without Mr Shelor Around
1.Start Photo shop and customize the Photoshop window
2.Open a photo
3.Identify parts of the Photoshop window
4.Explain file types
5.Save a photo for both print and the Web
6.Edit a photo using the Navigator palette and the Zoom Tool
7.Crop and resize a photo
8.Create a blended border
9.Print a photo
10.Use Adobe Help
11.Close a photo and quit Photoshop

Original Photo	Edited Photo

Key Terms:
A ***border*** is a decorative edge on a photo or a portion of a photo. A border visually separates the photo from the rest of the page. Rounded borders soften the images in a photo. Square borders are more formal. A border must define how many pixels wide a border will be. That is why you enter the width in pixels.

A **pixel** is an individual mapped square of light that is the basic unit used to create digital images.

When you **fill a selection**, you blend a color or a pattern into the selection area. **Blending modes** are the ways in which pixels in the image are affected by a color. Opacity refers to the level at which you can see through the color to reveal the paper or layer beneath it. For example, 1% opacity appears nearly transparent, whereas 100% opacity appears completely opaque (nontransparent, cloudy, filmy, blurred, smeared, smeary, misty, hazy; dirty, muddy, muddied, grimy, antonym transparent, translucent, clear.).

Sometimes it is necessary to **resize an image** to fit within certain space limitations. **Resize means to scale or change the dimensions of the photo**.
Zooming in or dragging a corner of the document window to change the size **is not the same** as actually changing the dimensions of the photo.

LESSON STARTS HERE....FOLKS

Opening and Cropping a Photo-
1.Download the picture file for this lesson from our class website-watch the lesson video if it is up too
2.Open Photoshop-then drag the picture file into the Photoshop window
