 4. Export Movie to our desktop
 5. Copy Movie to your Google Drive in Your Arts & Communications Folder
-
6. BEGAN Working on New Video Edit Project
MUSIC VIDEO EDIT
 - 7.** Find where you downloaded the video/pic files from today
 8. Make a New Event and New Project-named
MUSIC VIDEO
 9. Follow instructions below to edit your website

Creating Video #2Music Video EDIT

1. Download the AC Pathway.mov, the kona-bluerock .mov, and the blue rock logo from below
2. Import all files to your program.....create a new project called Kona BlueRock and a new event called BlueRock
3. Put the AC Pathway.mov at the beginning of your timeline as your opening sequence
4. Scrub (watch) thru the kona blue rock.mov and bring down the first 30 seconds of the clip when the musicians start to play (you are cutting out (ignoring) the part when they are tuning up
5. Bring the overall music clip volume down -3db
6. Put a 1 second fade-in and fade-out on the audio (volume) section of the clip
7. Add a short transition (your choice) to the section of the clip between the AC Pathway.mov and the beginning of the musicians playing music
8. Use the BLADE tool, and cut the kona blue rock .mov (musicians playing clip) into 2 sections
9. Select one of the sections from above and add an EFFECT from the EFFECTS tab (your choice)
10. Bring the blue rock-logo small down to the video timeline and place it above the clip of the musicians playing, and place the logo in the bottom left hand corner of the screen for 10 seconds
11. When pau with all the above, select all clips on the timeline, and SHARE>Master File--and be sure you watch where this file is going---(it should go to a folder on your desktop)
12. Go to your Google DRIVE-- and add your finished movie to your Google Drive in a new folder called ARTS & COM
13. We will embed the video in your website later....
